

ADDENDUM #2

TENDER NAME: Single Axle 35,000lb GVW Dump Truck Supply & Delivery
RFQ NO.: 2017-18
ADDENDUM ISSUE DATE: September 13, 2017

The Tender Documents are revised by this addendum as noted herein. All such revisions or clarifications become a part of the Tender Documents and shall be included in your bid. No consideration will be allowed for extras due to the Bidder not being familiar with this addendum. This Addendum contains **one (1)** page(s) in total.

The Tender Documents are revised as follows:

Question #1 (Q #1):

On page 21 of 24 of the Equipment Specifications, under "Tow Apron", Item #4 states that glad hands are a required specification. Glad hands are required to connect the truck air brakes to the trailer air brakes. There is no where else in the tender that it states the truck will require to pull an air brake equipped trailer. Most single axle trucks do not pull air brake equipped trailers. Will this truck need the appropriate components to pull an air brake trailer? The components included to pull an air brake trailer are fairly expensive.

Answer #1 (A #1):

Please remove Item #4 "Glad Hands" specification requirement under the "Tow Apron" portion (page 21 of 24) of the Equipment Specifications. At this time there is no requirement to tow an air brakes trailer.

END OF ADDENDUM #2
