For Immediate Release

Castlegar, BC – Sewer Main Flushing

The City will begin sewer main flushing on Wednesday, June 19, 2024, in the Arrow Lakes Drive area and will continue working throughout the downtown area until complete. This work is expected to take approximately three weeks. Although crews do their best to minimize the impacts of this work, in certain cases, the water in your toilet bowl may turn brown or spray out of your toilet. This is caused by back pressure from the sewer lines to the toilet. You can help to contain the splashing by putting your toilet lids down.

The City apologizes for the inconvenience and appreciates residents' patience while flushing is completed. Please visit the City's website and Facebook page for updates on the crew's location as they work their way through the downtown area.
